Subject Index

Methods and constructs

Theoretical

Computational methods for electronic structure

Central atom 1s photoabsorption spectra of nitrogen and phosphorus AX_3 (A = N, P and X = F, H) molecules, A. Jürgensen and R.G. Cavell 273 (2001) 77

-density functional theory

Calculation of non-fundamental IR frequencies and intensities at the anharmonic level. I. The overtone, combination and difference bands of diazomethane, H_2CN_2, I. Baraille, C. Larrieu, A. Dargelos and M. Chaillet 273 (2001) 91

Theoretical approaches of the isomerization mechanism of GaSO isomers in doublet states at density functional theory levels, Y. Bu 273 (2001) 103

Theoretical study of the photoionization shape resonances of cobaltocene and nickelocene, G. Fronzoni, M. Stener, S. Furlan and P. Decleva 273 (2001) 117

Semiempirical methods

First hyperpolarizability in proton-transfer benzoxazoles: computer-aided design, synthesis and study of a new model compound, S. Hillebrand, M. Segala, T. Buckup, R.R.B. Correia, F. Horowitz and V. Stefani 273 (2001) 1

Relativistic electronic structure theory

Four-component relativistic calculations on the complexes between a water molecule and trivalent lanthanoid and actinoid ions, Y. Mochizuki and H. Tatewaki 273 (2001) 135

Ionization dynamics of CF_4–H_2O complexes: a full dimensional ab initio trajectory study, H. Tachikawa 273 (2001) 149

Wavefunctions for highly excited and unbound states

Theoretical study of the photoionization shape resonances of cobaltocene and nickelocene, G. Fronzoni, M. Stener, S. Furlan and P. Decleva 273 (2001) 117

PII: S0301-0104(01)00532-8

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
First hyperpolarizability in proton-transfer benzoxazoles: computer-aided design, synthesis and study of a new model compound, S. Hillebrand, M. Segala, T. Buckup, R.R.B. Correia, F. Horowitz and V. Stefani 273 (2001) 1
Spectral density of H-bonds. II. Intrinsic anharmonicity of the fast mode within the strong anharmonic coupling theory, N. Rekik, A. Velcescu, P. Blaise and O. Henri-Rousseau 273 (2001) 11
Rhodamine $3B^+$ ClO_4^- electronic transitions: reaction field and vibrational structure, J.A.B. Ferreira and S.M.B. Costa 273 (2001) 39
The localization/delocalization dilemma in mixed-valence systems: a theoretical investigation on the application of the photon echo technique, A. Lami 273 (2001) 159

Radiative (incl. relativistic) effects on molecules and molecular processes
Effects of the transition dipole moment function on the dynamics of ozone photodissociation: an exact 3D quantum mechanical study, S.Y. Lin, K.L. Han and G.Z. He 273 (2001) 169

Scattering of waves and particles
Comparison of semiclassical methods for time dependent density evolution for a two state model problem, M.F. Herman 273 (2001) 175

Reactive molecular dynamics including dissipative processes
Ionization dynamics of CF_4–H_2O complexes: a full dimensional ab initio trajectory study, H. Tachikawa 273 (2001) 149

Intramolecular dynamics
Anions of the hydrogen-bonded thymine dimer: ab initio study, A.F. Jalbout, J. Smets and L. Adamowicz 273 (2001) 51
The localization/delocalization dilemma in mixed-valence systems: a theoretical investigation on the application of the photon echo technique, A. Lami 273 (2001) 159
π–σ^* hyperconjugation mechanism on methyl rotation in cationic state of substituted toluenes, M. Kawai and H. Nakai 273 (2001) 191

Molecular dynamics of many particle systems and condensed phases
Coupling between lattice and intramolecular modes in 9,10-dimethylanthracene: Raman spectra under pressure and quasi-harmonic lattice dynamics calculations, R.G. Della Valle, E. Venuti, L. Farina and A. Brillante 273 (2001) 197

Equilibrium statistical mechanics and thermodynamics
Erratum to "Study of sulfur α-S_8 crystals with an anisotropic inter-molecular potential model" [Chem. Phys. 261 (2000) 317–321], C. Pastorino and Z. Gamba 273 (2001) 73
Electron correlation and basis set effects on strong hydrogen bond behavior: a case study of the hydrogen difluoride anion, S.-i. Kawahara, T. Uchimaru and K. Taira 273 (2001) 207

Experiment

Molecular spectroscopy
Ultrafast energy transfer and population buildup among strongly coupled and curve crossing regions of the boron oxide A $^2\Pi$ and X $^2\Sigma^+$ states, J.L. Gole, B. Ohllson and G. Green 273 (2001) 59

-infrared
Anharmonicity and hydrogen bonding. III. Analysis of the near infrared spectrum of water trapped in argon matrix, J.P. Perchard 273 (2001) 217

-Raman
Coupling between lattice and intramolecular modes in 9,10-dimethylanthracene: Raman spectra under pressure and quasi-harmonic lattice dynamics calculations, R.G. Della Valle, E. Venuti, L. Farina and A. Brillante 273 (2001) 197

-visible
Rhodamine $3B^+$ ClO_4^- electronic transitions: reaction field and vibrational structure, J.A.B. Ferreira and S.M.B. Costa 273 (2001) 39

X-ray spectroscopy
Central atom 1s photoabsorption spectra of nitrogen and phosphorus AX_3 (A = N, P and X = F, H) molecules, A. Jürgensen and R.G. Cavell 273 (2001) 77

Nonlinear optics and spectroscopy
First hyperpolarizability in proton-transfer benzoxazoles: computer-aided design, synthesis and study of a new model compound, S. Hillebrand, M. Segala, T. Buckup, R.R.B. Correia, F. Horowitz and V. Stefani 273 (2001) 1
Picosecond absorption anisotropy of polymethine and squarylium dyes in liquid and polymeric media, O.V. Przhonska, D.J. Hagan, E. Novikov, R. Lepkowicz, E.W. Van Stryland, M.V. Bondar, Y.L. Slominsky and A.D. Kachkovski 273 (2001) 235

Objects

Bulk systems

Gases
Central atom 1s photoabsorption spectra of nitrogen and phosphorus AX_3 (A = N, P and X = F, H) molecules, A. Jürgensen and R.G. Cavell 273 (2001) 77
Comparison of semiclassical methods for time dependent density evolution for a two state model problem, M.F. Herman 273 (2001) 175

Liquids neat
Rhodamine $3B^+$ ClO_4^- electronic transitions: reaction field and vibrational structure, J.A.B. Ferreira and S.M.B. Costa 273 (2001) 39

Crystals

-neat

Coupling between lattice and intramolecular modes in 9,10-dimethylanthracene: Raman spectra under pressure and quasi-harmonic lattice dynamics calculations, R.G. Della Valle, E. Venuti, L. Farina and A. Brillante 273 (2001) 197

Microscopic and mesoscopic systems

Molecules (neutral and ionic)

Rhodamine $3B^+$ ClO_4^- electronic transitions: reaction field and vibrational structure, J.A.B. Ferreira and S.M.B. Costa 273 (2001) 39

Theoretical approaches of the isomerization mechanism of GaSO isomers in doublet states at density functional theory levels, Y. Bu 273 (2001) 103

Effects of the transition dipole moment function on the dynamics of ozone photodissociation: an exact 3D quantum mechanical study, S.Y. Lin, K.L. Han and G.Z. He 273 (2001) 169

π–σ^* hyperconjugation mechanism on methyl rotation in cationic state of substituted toluenes, M. Kawai and H. Nakai 273 (2001) 191

-small polyatomics

Erratum to "Study of sulfur α-S_8 crystals with an anisotropic inter-molecular potential model" [Chem. Phys. 261 (2000) 317–321], C. Pastorino and Z. Gamba 273 (2001) 73

Central atom 1s photoabsorption spectra of nitrogen and phosphorus AX_3 (A = N, P and X = F, H) molecules, A. Jürgensen and R.G. Cavell 273 (2001) 77

Calculation of non-fundamental IR frequencies and intensities at the anharmonic level. I. The overtone, combination and difference bands of diazomethane, H_2CN_2, I. Baraille, C. Larrieu, A. Dargelos and M. Chaillet 273 (2001) 91

Electron correlation and basis set effects on strong hydrogen bond behavior: a case study of the hydrogen difluoride anion, S.-i. Kawahara, T. Uchimaru and K. Taira 273 (2001) 207

Anharmonicity and hydrogen bonding. III. Analysis of the near infrared spectrum of water trapped in argon matrix, J.P. Perchard 273 (2001) 217

-aromatics

π–σ^* hyperconjugation mechanism on methyl rotation in cationic state of substituted toluenes, M. Kawai and H. Nakai 273 (2001) 191

-other large

Theoretical study of the photoionization shape resonances of cobaltocene and nickelocene, G. Fronzoni, M. Stener, S. Furlan and P. Decleva 273 (2001) 117

Molecular aggregates

Anharmonicity and hydrogen bonding. III. Analysis of the near infrared spectrum of water trapped in argon matrix, J.P. Perchard 273 (2001) 217

-dimers

Spectral density of H-bonds. II. Intrinsic anharmonicity of the fast mode within the strong anharmonic coupling theory, N. Rekik, A. Velcescu, P. Blaise and O. Henri-Rousseau 273 (2001) 11

Anions of the hydrogen-bonded thymine dimer: ab initio study, A.F. Jalbout, J. Smets and L. Adamowicz 273 (2001) 51

-complexes

Four-component relativistic calculations on the complexes between a water molecule and trivalent lanthanoid and actinoid ions, Y. Mochizuki and H. Tatewaki 273 (2001) 135

The localization/delocalization dilemma in mixed-valence systems: a theoretical investigation on the application of the photon echo technique, A. Lami 273 (2001) 159

Phenomena

Molecular structure

Ionization dynamics of CF_4–H_2O complexes: a full dimensional ab initio trajectory study, H. Tachikawa 273 (2001) 149

Vibrations and rotations of molecules

Calculation of non-fundamental IR frequencies and intensities at the anharmonic level. I. The overtone, combination and difference bands of diazomethane, H_2CN_2, I. Baraille, C. Larrieu, A. Dargelos and M. Chaillet 273 (2001) 91

Coupling between lattice and intramolecular modes in 9,10-dimethylanthracene: Raman spectra under pressure and quasi-harmonic lattice dynamics calculations, R.G. Della Valle, E. Venuti, L. Farina and A. Brillante 273 (2001) 197

Anharmonicity and hydrogen bonding. III. Analysis of the near infrared spectrum of water trapped in argon matrix, J.P. Perchard 273 (2001) 217

Picosecond absorption anisotropy of polymethine and squarylium dyes in liquid and polymeric media, O.V. Przhonska, D.J. Hagan, E. Novikov, R. Lepkowicz, E.W. Van Stryland, M.V. Bondar, Y.L. Slominsky and A.D. Kachkovski 273 (2001) 235

Electronic structure and states

Central atom 1s photoabsorption spectra of nitrogen and phosphorus AX_3 (A = N, P and X = F, H) molecules, A. Jürgensen and R.G. Cavell 273 (2001) 77

Calculation of non-fundamental IR frequencies and intensities at the anharmonic level. I. The overtone, combination and difference bands of diazomethane, H_2CN_2, I. Baraille, C. Larrieu, A. Dargelos and M. Chaillet 273 (2001) 91

Theoretical approaches of the isomerization mechanism of GaSO isomers in doublet states at density functional theory levels, Y. Bu 273 (2001) 103

Four-component relativistic calculations on the complexes between a water molecule and trivalent lanthanoid and actinoid ions, Y. Mochizuki and H. Tatewaki 273 (2001) 135

Molecular interactions

Ultrafast energy transfer and population buildup among strongly coupled and curve crossing regions of the boron oxide A $^2\Pi$ and X $^2\Sigma^+$ states, J.L. Gole, B. Ohllson and G. Green 273 (2001) 59

Erratum to "Study of sulfur α-S_8 crystals with an anisotropic inter-molecular potential model" [Chem. Phys. 261 (2000) 317–321], C. Pastorino and Z. Gamba 273 (2001) 73

Ionization dynamics of CF_4–H_2O complexes: a full dimensional ab initio trajectory study, H. Tachikawa 273 (2001) 149
Electron correlation and basis set effects on strong hydrogen bond behavior: a case study of the hydrogen difluoride anion, S.-i. Kawahara, T. Uchimaru and K. Taira 273 (2001) 207
Anharmonicity and hydrogen bonding. III. Analysis of the near infrared spectrum of water trapped in argon matrix, J.P. Perchard 273 (2001) 217

Spectral bandshapes and intensities
Spectral density of H-bonds. II. Intrinsic anharmonicity of the fast mode within the strong anharmonic coupling theory, N. Rekik, A. Velcescu, P. Blaise and O. Henri-Rousseau 273 (2001) 11
Rhodamine $3B^+$ ClO_4^- electronic transitions: reaction field and vibrational structure, J.A.B. Ferreira and S.M.B. Costa 273 (2001) 39

Energy transfer processes
Comparison of semiclassical methods for time dependent density evolution for a two state model problem, M.F. Herman 273 (2001) 175

Photochemistry
Ionization dynamics of CF_4–H_2O complexes: a full dimensional ab initio trajectory study, H. Tachikawa 273 (2001) 149
Effects of the transition dipole moment function on the dynamics of ozone photodissociation: an exact 3D quantum mechanical study, S.Y. Lin, K.L. Han and G.Z. He 273 (2001) 169

Intramolecular dynamics
Ultrafast energy transfer and population buildup among strongly coupled and curve crossing regions of the boron oxide A $^2\Pi$ and X $^2\Sigma^+$ states, J.L. Gole, B. Ohllson and G. Green 273 (2001) 59
π–σ^* hyperconjugation mechanism on methyl rotation in cationic state of substituted toluenes, M. Kawai and H. Nakai 273 (2001) 191

Nonlinear responses (incl. optical)
First hyperpolarizability in proton-transfer benzoxazoles: computer-aided design, synthesis and study of a new model compound, S. Hillebrand, M. Segala, T. Buckup, R.R.B. Correia, F. Horowitz and V. Stefani 273 (2001) 1
The localization/delocalization dilemma in mixed-valence systems: a theoretical investigation on the application of the photon echo technique, A. Lami 273 (2001) 159
Picosecond absorption anisotropy of polymethine and squarylium dyes in liquid and polymeric media, O.V. Przhonska, D.J. Hagan, E. Novikov, R. Lepkowicz, E.W. Van Stryland, M.V. Bondar, Y.L. Slominsky and A.D. Kachkovski 273 (2001) 235

Reactions (incl. dissociation)
Ultrafast energy transfer and population buildup among strongly coupled and curve crossing regions of the boron oxide A $^2\Pi$ and X $^2\Sigma^+$ states, J.L. Gole, B. Ohllson and G. Green 273 (2001) 59

-collisional
Ultrafast energy transfer and population buildup among strongly coupled and curve crossing regions of the boron oxide A $^2\Pi$ and X $^2\Sigma^+$ states, J.L. Gole, B. Ohllson and G. Green 273 (2001) 59

Tunneling
Spectral density of H-bonds. II. Intrinsic anharmonicity of the fast mode within the strong anharmonic coupling theory, N. Rekik, A. Velcescu, P. Blaise and O. Henri-Rousseau 273 (2001) 11

Electron transfer
The localization/delocalization dilemma in mixed-valence systems: a theoretical investigation on the application of the photon echo technique, A. Lami 273 (2001) 159

Proton and hydrogen atom transfer
First hyperpolarizability in proton-transfer benzoxazoles: computer-aided design, synthesis and study of a new model compound, S. Hillebrand, M. Segala, T. Buckup, R.R.B. Correia, F. Horowitz and V. Stefani 273 (2001) 1
Spectral density of H-bonds. II. Intrinsic anharmonicity of the fast mode within the strong anharmonic coupling theory, N. Rekik, A. Velcescu, P. Blaise and O. Henri-Rousseau 273 (2001) 11

Ionization (incl. Rydberg states)
Theoretical study of the photoionization shape resonances of cobaltocene and nickelocene, G. Fronzoni, M. Stener, S. Furlan and P. Decleva 273 (2001) 117

Electronic process in gases
Comparison of semiclassical methods for time dependent density evolution for a two state model problem, M.F. Herman 273 (2001) 175

Structure of solids, liquids and gases
Erratum to "Study of sulfur α-S_8 crystals with an anisotropic inter-molecular potential model" [Chem. Phys. 261 (2000) 317–321], C. Pastorino and Z. Gamba 273 (2001) 73
Coupling between lattice and intramolecular modes in 9,10-dimethylanthracene: Raman spectra under pressure and quasi-harmonic lattice dynamics calculations, R.G. Della Valle, E. Venuti, L. Farina and A. Brillante 273 (2001) 197
